Profile

Software developer based in the Czech Republic. With 5+ years of software development experience, Been involved in designing, developing, and maintaining applications ranging from simple BASH scripts to manage some personal DevOps and server needs, to developing personal projects that grow to be used by clients, to internal applications used by coworkers from all departments. I understand the software development life-cycle and also being agile and open-minded to always be updated and keep with the ever-changing field.

Experience

Jun 2025 - PRESENT

Xenon Tech – *Co-founder, Main Software Engineer*

- Responsible for architecting, and designing hagzee.com, which is a platform to manage appointments for any service provider, from dentists to venues.
- Having it up and running required excellent orchestration between the front end and back end, hagzee.com was built using ExpressJS backend (For extensibility, speed, and modularity with middleware), a React (NextJS, with the help of Mantine components) front-end, with a PostgreSQL database with no ORM, migrations and simple tasks were automated with BASH.
- All of this was hosted on a VPS, with Docker and Docker Compose being the backbone of all the services.

May 2023 - Mar 2025

VML Prague – *Web Developer*

- First I was mainly responsible for the layout of the website, and doing front-end and design changes for whenever the client needed it.
- Afterwards, I started getting involved in developing and maintaining an application that used LLMs to provide an internal service to a VML client.
- Working mainly included NestJS on the backend, React on the front-end with Vite, as well as Azure Cloud Services and Azure Functions

Skills + Hobbies

Mainly JavaScript and Python for programming languages, sometimes C# and .NET sometimes CSS - For me it's always a work in progress, the more you know CSS, the more you don't.

Linux, Docker - I have been using linux on my main computer for at least 6 years, I just like the possibilities, I used Docker for work, and for self-hosting (Immich for pics, and Validrome for music, among others)

Databases - I have worked with all kinds of databases, I prefer PostgreSQL and MariaDB with adminer.

Building, and fixing PCs and laptops
